Subject: Lloyd's Register Mass Flow Metering Accreditation Services - Authorised Representative

This letter serves as a notice to confirm that **Metcore International Pte Ltd** is authorised by **Lloyd's Register Asia** to act on its behalf as global representative for carrying out mass flow metering systems engineering services.

Metcore International Pte Ltd carries out technical engineering services on Mass Flow Metering Systems on Bunker Tankers, which form the basis of eventual accreditation of the mass flow metering systems, if verification of the system's accuracy has been deemed successful by Lloyd's Register Asia in line with **TR 48: Technical Reference for Bunker Mass Flow Metering**.

Lloyd's Register Asia has carried out technical due diligence on Metcore International Pte Ltd's technical capability as well as its quality assurance procedures to satisfy itself of the capabilities and integrity of the services provided by Metcore International Pte Ltd.

We would be most grateful if you could extend your full cooperation to Metcore International Pte Ltd at all times when carrying out their technical services field work on bunker tankers so as to ensure the mass flow metering system can be verified robustly in order for Lloyd's Register Asia to issue the independent accreditation certificate for the metering system after the services have been completed.

Yours faithfully,

Douglas Raitt
