M/T Yee Lee 2
Bunker Tanker

This is to certify that:

Mass Flow Meter System Performance Verification

This statement is issued to M/S Excelfame Consultants Company Limited to confirm measurement accuracy performance validation of the Emerson mass flow meter system, CMFHC 3 (S/N 12037805) installed on the M/T Yee Lee 2 owned by M/S Excelfame Consultants Limited.

The metering system successfully passed field tests of delivering marine bunker fuel oil in accordance with TR 48. The data obtained from the field tests was assessed by Singapore's Metrology Agency, NMC A*STAR, to meet legal metrology limits for delivery of marine bunker fuel oil. The expanded measurement uncertainty was found to be within 0.5%.

In order for Lloyd's Register to arrive at and endorse this conclusion, a robust and vigilant process was undertaken covering all aspects of the mass flow metering system integrity:

- Meter measurement traceability
- Operational procedures
- Metering system security
- Independent collection of test data for legal metrology assessment

By following this approach, it can be assured that all loading and delivery operations must go through the approved mass flow metering system and for it to be used for custody transfer application
